

IN THE SPECIFICATION:

Page 8, paragraph three, four and five, REPLACE as follows:

In an alternate embodiment of the ~~intention~~ **invention**, a push-mode enables the user's terminal to broadcast user profile information.

In another alternate embodiment of the ~~intention~~ **invention**, the user's short-range wireless terminal can share information in its personal profile with the inquiring wireless terminal, if their respective user profiles match within a predefined tolerance.

In another alternate embodiment of the ~~intention~~ **invention**, the user's short-range wireless terminal can share the general information portion of his/her local user profile with another short-range wireless terminal, if their respective user profiles have a first level of close matching. If their respective user profiles have a second level of closer matching, the two terminals can further share more detailed information in their respective user profiles.
